Payoff at maturity

This chart shows the redemption amount at maturity (payoff) depending on the final level of the underlying (reference value). The green circle shows the intrinsic value, which is the amount investors would receive if, at maturity, the reference value is unchanged from its current level.

Is it your investment match?

This section will help you determine whether the product is right for you. Is the mechanism well adapted to your market expectation? Does the capital protection feature match your risk tolerance?

This product is right for you if:

- ✓ You are looking to earn an income above the market rate
- ✓ You are neutral, moderately bearish or moderately bullish on the underlying assets
- ✓ You can tolerate the reinvestment risk arising from an early redemption (autocall)
