A. PRODUCT DESCRIPTION

The Investor expects a sideward or moderate rise of the Underlyings. The Barrier should be lower than the level the Investor expects the Underlyings to be at the maturity of the Certificate.

An autocallable Certificate offers a potential return which is higher than the return on an equivalent term vanilla bond. The interest payable is determined by reference to

REDEMPTION

Subject to an Early Redemption, each Certificate entitles the Investor to receive the Interest on the Interest Payment Dates. In addition on the Redemption Date, the Investor will receive either:

1: **if each Fixing (Final) is equal to or above its respective Barrier or at least one Fixing (Final) is equal to or above its respective Star Level:**

100% of the Nominal in cash; or

2: **if at least one Fixing (Final) is below its respective Barrier:**

The Nominal multiplied by the Worst Performance, paid in cash.

Worst Performance

The Worst Performance is calculated by dividing the Fixing (Final) by the Fixing (Initial) in relation to each Underlying. The Worst Performance corresponds to the lowest of all such calculated values.

Early Redemption

If on one of the below noted Observation Dates the Fixing of each Underlying is equal to or above its respective Trigger Percentage multiplied by the Fixing (Initial), the Certificate will be redeemed and the Investor will receive on the respective Early Redemption Date an amount equal to the relevant Early Redemption Value multiplied by the Nominal.

B. PROFIT / LOSS PROSPECTS

Effect of the performance of the Underlying(s) on the redemption amount	Positive performance: If all the Underlyings perform positively, the investor realises a positive return. Sideways to slightly negative performance: If all the Underlyings perform sideways to slightly negative, the investor realises a positive return. Pronounced negative performance: If at least one of the Underlyings performs negatively and the Barrier is triggered, the investor may lose some or all of the investment.
Maximum Profit at Maturity/ Maximum Loss at Maturity	Maximum Loss: The minimum repayment of the Certificate is zero in case at least one of the Underlyings is zero and none of the Underlyings is at or above its Star Level on the Final Fixing Date. Certificate specific risks	This product offers no minimum repayment amount and you may lose your entire investment. This product is intended to provide a limited maximum return and a limited exposure to the worst performing underlying, therefore your return will be lower than a direct investment in the underlyings in certain circumstances. This product may redeem early. Should this occur and you

- In the case of Securities referencing one or more indices or other underlying assets (collectively, the "Underlyings"), changes in the price of the Securities may not correlate to changes in the value of the Underlyings; any declines or gains in the value of one Underlying may be more than offset by movements in the value of other Underlyings.
- The price of these Securities may be adversely affected by trading and other transactions by GS relating to the Securities and/or any Underlyings
- The price of these Securities could be significantly impacted by determinations that GS may make in its sole discretion from time to time as calculation agent and/or index sponsor, as the case may be.
